

STATEMENT ON THE RELEVANCE OF SUSTAINABLE DEVELOPMENT FOR FONDO DE FONDOS' GROUP OF COMPANIES

JULY 2026

At Fondo de Fondos, we are aware that the needs and concerns of our stakeholders have changed; humanity and our planet demand responsible actions aimed at generating business based on a criterion of social and environmental impact.

We know that our decisions affect our promoted investments, shareholders, employees, suppliers, and other stakeholders.

For Fondo de Fondos' Group of Companies, sustainability is a relevant component of our operational strategy for achieving continuity, competitive advantages, and profitability in a global environment that is increasingly vulnerable to environmental, social, and governance factors. This commitment translates into concrete actions addressing each of these three factors: environmental, through the responsible management of natural resources and the mitigation of climate risks in our investments; social, through respect for the human and labor rights of our stakeholders; and governance, through transparency, accountability, and integrity in decision-making.

As a signatory to the Principles for Responsible Investment and a member of the UN Global Compact, we declare that Fondo de Fondos' Group of Companies continuously strives to strengthen the foundations for developing an internal culture committed to upholding the values and principles of sustainability that enable us to create value through responsible investment. This commitment is implemented in alignment with the Sustainable Development Goals of the United Nations 2030 Agenda and with the international impact management standards applicable to development institutions.
