SUSTAINABILITY – ESG / Environmental

CADU is working to consolidate its position as one of the leaders in the housing sector in terms of environmental practices, through the development of sustainable housing prototypes, which feature eco-technologies aimed at optimizing the consumption of:

Contributing to the reduction of CO_2 emissions

11 SUSTAINABLE CITIES AND COMMUNITIES

13 CLIMATE ACTION

As of the end of September 2026, CADU had **+5,900 homes** with EDGE certification

As of the end of September 2026, **~39%** of homes with ECOCASA certification in Mexico were built by CADU

+34,900 homes

Built by CADU are ECOCASA- or EDGE-certified

ECOCASA is a program that aims to reduce Greenhouse Gas (GHG) emissions by at least 20% and up to 40%, in addition to making water use more efficient.

At CADU we build homes with **eco-technologies** oriented to optimize the consumption of water, electricity and gas, which contributes to the reduction of emissions of CO_2.

CADU is the company with the largest number of homes with ECOCASA certification in Mexico (+29,000 units as of September 2026 out of a total of 74,701 as of July 2026, according to the SHF). As of the end of September 2026, CADU had a ~39% share of the total national homes with ECOCASA certification.

EDGE IFC EDGE certification for homes whose prototypes enable savings of up to 47% in energy, 39% in water and 75% in embodied energy in materials. The first 798 homes were certified in 2022, and as of the end of September 2026, CADU had more than 5,900 homes with EDGE certification.

SUSTAINABILITY – ESG / Sustainable Projects - Aldea Tulum

Aldea Tulum complies with the 7 priority points framed in the United Nations Human Settlements Programme (UN-Habitat).

1. Security of tenure (deed)
2. Availability of services, materials, facilities and infrastructure
3. Affordability
4. Habitability
5. Accessibility for people with “different abilities“
6. Location (6 km from Tulum center)
7. Cultural adaptation (tropicalization)

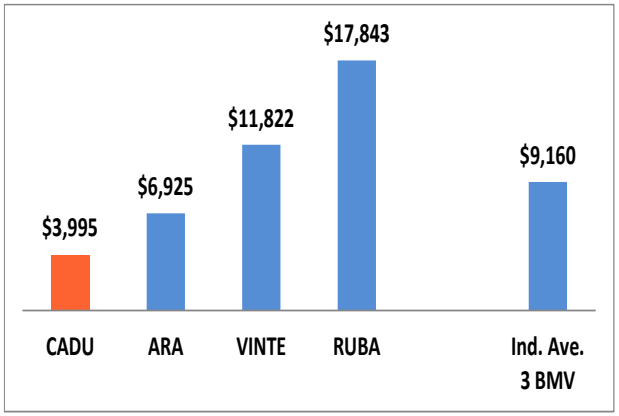

Certification under the ECOCASA Program is contemplated, with a minimum 20% reduction in Greenhouse Gas (GHG) emissions compared to the baseline, estimating a reduction of 117.31 tCO_2e/m^2 per year for the development. In addition, some parks within the development will feature public lighting using LED lamps powered by energy generated through solar panels.

NOTE: As of September 2026, 7,461 homes of the Aldea Tulum Project have been sold.
